HALF YEARLY COMPLIANCE REPORT

For the period of April 2017 to September 2017

Environmental Clearance for sugar unit with capacity of 12000 TCD,
Ministry of Environment, Forest and Climate Change, Govt of India
File No. J-11011/38/2016-IA-II (I) Dated 20th December, 2016.

A. Specific Conditions:

Sr. No	Compliance Conditions	Implementation	Remark
i	ESP/Bagfilter shall be provided to the bagasse fired boiler (20,75 TPH and 90 TPH) to control particulate emissions within permissible limit. The gaseous emissions shall be dispersed through stack of adequate height as per CPCB/SPCB guidelines. No wet scrubber shall be used. Existing boiler (55 TPH) will be converted in to 75 TPH boiler.	Complied	1. ESP for 90 & 75 TPH Boiler has been installed. 2. Height of the stack of 90 & 20 TPH boiler is 75 mtr. and 75 TPH Boiler is 72 mtr. which is adequate.
	ESP/Bagfilter shall be provided to the bagasse fired boiler 20 TPH to control particulate emissions within permissible limit.	Not Complied	3. Proposed to replace of wet scrubber of 20 TPH Boiler to ESP.
ii	Pucca approach road to project site should be constructed prior to commencing construction activity of the main distillery to avoid fugitive emissions.	Not applicable	1. We do not have distillery unit. 2. We have pucca approach road network within factory premises.
iii	Total fresh water requirement from Doodhganga River shall not exceed 600 m ³ /day for sugar unit and Co-generation power plant. No ground water shall be used without permission. Effort shall be made to use recycled water from sugar and condensate of MEE for the Co-generation power unit.	Complied	We will not be exceeding the total fresh water requirement of 600 m ³ /day from Doodhganga River. Ground water shall not be used without permission.
iv	Water consumption also to be restricted to 100 liters/ton initially and further to 50 liters /ton cane crushed in a time bound manner as per the CPCB guidelines.	Complied	As per CPCB guidelines, our water consumption is restricted to less than 100 liters/ton.

v	Effluent from sugar unit should be treated in the effluent treatment plant with adequate treatment with standard of 30 mg/l of BOD. Existing ETP shall be upgraded to achieve the standard of BOD 30 mg/l.	Complied	Existing ETP is upgraded to achieve the standard of outlet treated effluent BOD 30 mg/l.
vi	As proposed no effluent from sugar plant should be discharged outside the premises and Zero discharge shall be achieved.	Complied	We are recycling the treated effluent in the sugar unit and balance treated water is utilizing by farmers for agriculture purpose.
vii	Bagasse/coal storage should be done in such a way that it does not get air borne or fly around due to wind.	Complied	--
viii	Boiler ash should be stored separately as per CPCB guidelines so that it should not adversely affect air quality, becoming air borne by wind or water regime during rainy season by flowing along with the storm water. Direct exposure of workers to fly ash & dust should be avoided. Bagasse ash and coal ash should be stored separately.	Complied	--
ix	Occupational health surveillance programme should be under taken as regular exercise for all the employees. The first aid facilities in the occupational health center should be strengthened and the regular medical taste record of each employee should be maintained separately.	Complied	We are Conducting the occupational health surveillance programme is under taken as regular exercise for all the employees.
x	Dedicated parking facility for loading and unloading of material should be provided in the factory premises. Unit should develop and implement good traffic management system for their incoming and out going vehicles to avoid congestion on the public road.	Complied	Dedicated parking facility for loading and unloading of material is provided.
xi	All the issues raised during the public hearing / consultation meetings held on 10 th July, 2015 should be satisfactorily implemented.	Complied	--
